ICE BREAKERS
PROJECT 3

JOURNIFY
mobile

A journal for every journey…

- Our concept for JOURNIFY was a photo album creation site that keeps your private life private.

- While digital media tends to push a focus on sharing perfect pictures with a wide audience, we wanted to create a safe platform to document important life events.

- Our target audience is families who are concerned with professional and personal security.

Front-End and Design

Victoria David and
Jacky Turnmeyer

- The idea for JOURNIFY's design was a bright-yet-rustic color palette combined with wide fonts to create a sense of familiar calm.

- We added new features to consolidate the app into a single page, making it ideal for our mobile users.

Back-End Development

Lindsay Libhart

Michael Jordan

- Lindsay was responsible for the server-side conversions based on previous class modules, primarily the database conversion

- Stripe donation functionality was handled by Mike

your JOURNIFY

STAY TUNED FOR THE DEMO

Future Development

1 Create a share function that is view-only but allows for commenting.

2 Give users more account control.

3 Allow for more customization of personal journals.

4 Add simple photo editing capabilities.
